

ENTERPRISE CART MANAGEMENT UNIT

(shown with electronics option package)

A cart management service with the most advanced technology and customer service features.

Make the journey through your airport a pleasant one for travelers with the Smarte Carte® Enterprise. This computerized cart management unit is designed to make cart rental easier and more convenient for travelers. The Enterprise offers unmatched customer service features including credit card rental and change making capabilities.

Whether at check-in or baggage claim, you can improve passenger service with the Smarte

Carte Enterprise. Its compact, portable design permits carts to be placed anywhere travelers need them. And, the overhead sign and bold graphics package make it easy for travelers to find them.

Most importantly, an on-site team of Smarte Carte professionals will maintain the Enterprise cart management unit and carts, reducing your costs and giving you and your staff the freedom to focus on running the airport and serving your customers.
