

ELECTRONIC LOCKERS

Provide your customers convenient and secure storage for personal items.

Electronic lockers by Smarte Carte EFA are perfectly suited for use in airports, train stations, bus terminals, ferry terminals, shopping centres, hotels/hostels, sports centres and theme parks. The modular design makes it possible to combine different door sizes to fit the unique needs of each facility.

A Smarte Carte EFA locker concession provides your facility with a cost-free storage locker

solution, and you receive a percentage of the income generated by the locker rentals.

Smarte Carte EFA covers the cost of the initial investment, installation, spare parts and service. You provide the floor space, conduct regular checks to empty lockers, change faulty locks as needed and report the income to us on a monthly basis.

What an easy way to offer your customers a first-class locker service without any investment. Contact us for further information!

ELECTRONIC LOCKERS

- Constructed of high quality strength steel with a protective finish to resist corrosion and chipping to guarantee the long life of the lockers.
- The electronic time control of the lockers allows the operator to change the time or money base at any time.
- Key operated.
- Can accept up to six different coins.
- Doors sizes: 25x40, 25x60, 45x60 cm.
- Available in standard colour as shown; custom colours available.
- Option to network lockers via a local area network (LAN) to a host PC for easy supervision from a central location. Monitoring capabilities include revenues, usage, occupancy, overdue lockers and other performance metrics.

Time and money base are electronically controlled.
