

## MAGIC TOUCH™ 3000 SERIES ELECTRONIC LOCKERS

*smarte*locke®

**With the touch of a finger, guests enjoy the freedom and security of electronic locker technology.**

Smarte Locke® electronic lockers are the newest evolution in electronic locker technology. The system includes a high-resolution, color touch-screen display that allows users to choose their payment option (coins, bills, tokens or credit cards) and enjoy conveniences like enhanced graphical operating instructions, change-making capabilities and multiple entry with one rental payment.

Keyless technology and computerized reporting capabilities maximize security, increase locker availability and significantly reduce labor costs.

Smarte Locke's exclusive Security Management System further ensures a maximum level of security with features such as remote surveillance of all locker activity, automated reporting, active door alarms and system-wide emergency door opening or lock-down.

Smarte Locke electronic lockers are available through our popular concession program where Smarte Carte provides the lockers at no cost to you and maintains and manages the service – and we share the revenue with you!

# MAGIC TOUCH™ ELECTRONIC LOCKERS

- Keyless system utilizes computer-generated code or user-generated code for locker access.
- Customize your locker service to fit the needs of your facility with the flexibility to choose from 12 *proven* operating modes. Options include single entry or multiple entry which allows guests unlimited access to their belongings with one rental payment.
- Accepts bills, coins/tokens, credit cards or private label cards and returns change.
- 10.4 inch color touch-screen display provides instructions in 12 languages.
- Computerized operating efficiencies provide a reduction in labor and maintenance costs, and the ability to detect and enforce overdue lockers.
- Rented doors will lock automatically if left unattended, and each door includes an active alarm system for maximum security.
- Security Management System allows the operator to monitor locker activity from any rental station or from their office via a host PC. Monitoring capabilities include a history log of all locker activity, report generation, self-diagnostics for servicing and the ability to open or lock down all locker doors within seconds in an emergency.
- Smarte Locke electronics can be retrofitted to other manufacturer's locker doors, allowing you to upgrade your existing assets.
- Concession and lease options available.

With several *proven* operating modes, Smarte Locke has the locker solution that is right for your facility.
