

RAPID CHARGER

the *charge*carte®

Provide travelers with a quick, convenient way to charge their electronic devices.

With more than 70% of travelers carrying cell phones, PDAs and MP3 players, the need to recharge batteries at the airport is on the rise. Available outlets are scarce and not always in convenient locations, and travelers do not always have their charging cord with them when at the airport.

Smarte Carte, the passenger service leader, has the solution. The Charge Carte® by Smarte Carte® is a self-serve, rapid charging kiosk that turns one standard outlet into a charging station for twelve electronic devices – complete with charging cords for today's most popular cell phones, smartphones and the iPod®.

The rapid charge technology utilized by the Charge Carte will safely charge a cell phone up to twice as fast as a standard wall charger.

It is important for travelers to stay connected to be productive during airport dwell time, and in a recent survey, 60% of cell phone users said they would consider paying to charge their phone at the airport.

The Charge Carte service is managed and maintained by your on-site Smarte Carte team, a service provider you know and trust!

CHARGE CARTE® RAPID CHARGER

- Each cycle provides 30 minutes of rapid charge time. Customers can choose how long they want to let their device charge. Amount of charge received will vary depending upon how long the device is plugged in, the specific model and battery quality.
- Rapid charge technology provides the fastest possible charge without damaging the battery.
- Includes 12 connectors for the most popular cell phone, smartphone and iPod models from Motorola, Nokia, Samsung, LG, Kyocera, Blackberry, Palm, Siemens, Sony-Ericsson, Nextel, Apple's iPod and iPhone. The device models supported are changed as new models are put into service.
- The customer does NOT need to have their charger with them.
- Accepts major credit and debit cards. Uses Smarte Carte unattended credit card acceptance technology and does not require a telephone line.
- Counts down charge time so that the customer can see how much time remains before charge cycle is complete.
- Small footprint and lightweight design makes it easy to locate charging stations anywhere in the terminal where service is needed.
- Cashless system eliminates the opportunity for theft and ensures accurate revenue reporting to the airport.
- Improves passenger service and provides concession revenue for your airport.

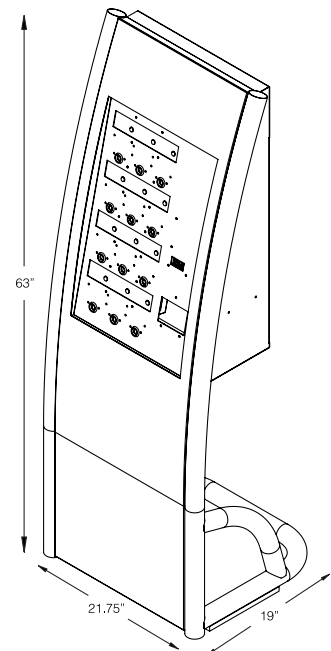

With the Charge Carte travelers pay a small fee by credit or debit card to get a rapid charge that will keep them connected with family or business.
